

PEOPLE ANIMATED BY SPIRIT OF WAR

Young Men of Balkan States
Eager to Go to the
Front.

LEGATIONS BUSY PLACES

Hardly Man of Fighting Age
Who Does Not Offer
Services.

Berlin, October 5.—The busiest place in Berlin this week were the Bulgarian and Serbian legations. Most of the Bulgarians and Serbians here are students or laborers. There are about 1,000 Bulgarians and 400 Serbians liable for war service. The mobilization of the armies of these two countries was followed immediately by the recall of all who were liable for military service. The response will give an idea of the war spirit now animating the Balkan people. It is doubtful if there was a single Bulgarian or Serbian in Berlin who did not respond to the call. The legations were besieged with animated young men who were eager to go to the front and hoping that war would be declared.

Bulgarian agents have been here this week endeavoring to place a loan. What success, if any, they had cannot be learned. They also bought about \$2,000,000 worth of munitions of war.

Telephone Nervousness.—Dr. Strauch, a mental specialist, has discovered a new disease which he calls telephone nervousness. A prominent Berlin attorney had been in continual conflict with the post-office for more than a year regarding his phone. Several times he was prosecuted on the charge of insulting the telephone girl and finally his telephone connection was cut off. The attorney immediately began proceedings for its restoration. The post-office department offered as a defense that the attorney was continually insulting officials.

Dr. Strauch was called as an expert, testified that telephone nervousness was a serious ailment. The telephone, he said, acts on certain persons like poison. He continued: "I know a case in my personal practice of a physician who was so worked up by delays and other unpleasant occurrences that he became permanently insane. Excitable persons should never use the phone."

The court was so impressed that it adjourned the case in order to enable Dr. Strauch to submit further instances

RULERS OF WAR-TRIOUBLED NATIONS AND COMPARATIVE FIGHTING STRENGTH

King Ferdinand of Bulgaria.

King Peter of Serbia.

of the disease and observations as to its effect.

Nobody Is Pleased.

As was to be expected the government's regulations which were designed to reduce the prices of meat have pleased nobody and up to the present have not bettered the situation. The special sources considered for the importance of cattle and swine were Russia, Serbia and Bulgaria. Almost on the heels of the new regulations came the way situation in the Balkans with the prohibition of the exportation of meat from Serbia and Bulgaria. Most people are displeased with the half way measures which appear most unlikely to be beneficial. The Agrarians are, of course, shrieking madly that they will be ruined by the government's disregard of their interests. Meanwhile prices of meat continue to soar. The wholesale prices at the Berlin stockyards are no lower for the poorer qualities and are higher for the better grades of all animals. No decrease in the retail prices is reported anywhere.

PARCELS POST STAMPS.

Twelve New "Mail Carriers" to Be Used for Transportation of Goods.

Washington, October 5.—When the new parcels post system becomes operative on January 1 twelve new stamps will be placed on sale in post-offices for affixing to packages. These stamps will be larger than the ordinary postage stamps. Arrangements already made by Postmaster-General Hitchcock for their engraving and manufacture provide for a series of an even dozen, so distinctive as to color and size as to prevent

possible confusion with other stamps.

The twelve stamps will be issued in three series of designs. In the first series modern methods of transporting mail will be illustrated. The mail car of a railway train will be shown on one stamp; an ocean steamer on another; the third will have a motor wagon of the type used in the postal service, and the fourth will show a mail-carrying aeroplane. Postal employees will be shown at work in the second series. The figures will be those of railway mail clerks, post-office clerks, city letter carriers and rural free delivery carriers. The third series will represent four industrial zones, showing the principal sources of products that will be transported most extensively by parcels post. By December 1 the stamps will probably be ready for distribution to the 50,000 post-offices in the country.

Fuller—Byerley.

Harrisonburg, Va., October 5.—An announcement is made of the marriage of Miss Kathryn Byerley, daughter of Mrs. Peter D. Byerley, of Pleasant Valley, and James I. Fuller, of Richmond. After October 18 they will be at home at 2303 Hanover Avenue, Richmond.

NINE PRISONERS ESCAPE.

Third Delivery at Tazewell Since Erection of New Jail.

[Special to The Times-Dispatch.] Tazewell, Va., October 5.—Another jail delivery occurred here last night. Nine prisoners, four of whom were white men, escaped about midnight by sawing the bars of the jail. This is the third delivery of prisoners which has occurred here since the new jail was built, one delivery occurring about two months ago. It is believed that saws were taken to the prisoners by

confederates on the outside. The sheriff and a posse of deputies are searching the county and it is believed that a majority of the men will be arrested before night. It is reported here that the county authorities will institute civil action against the Stuart Jail Works of Cincinnati, who constructed the jail and compel the concern to replace the bars in the cells.

New Hotel for Salisbury.

[Special to The Times-Dispatch.] Salisbury, N. C., October 5.—Salisbury is to have a new hotel at a cost of \$100,000, a charter having been granted yesterday. The principal incorporators are J. P. Saunders, of Greensboro, and T. A. Green, of Spartanburg. The new hotel will be located near the passenger station.

Fuller's Case Continued.

The case of William J. Fuller, who is being held here as a fugitive from justice in Norfolk and also as a suspicious character, suspected of having attempted to obtain money by false pretenses in this city, was continued yesterday morning in Police Court until next Saturday. In the meantime Captain of Detectives McMahon expects that he will be able to collect sufficient evidence against him to swear out a warrant.

IMPORTANT CHANGE IN SCHEDULE.

R. F. & P. R. R. Commencing Monday, October 7th, train No. 17 will leave Washington 3:35 P. M. week days (instead of 3:40 P. M.), arriving Richmond 6:30 P. M. instead of 6:35 P. M. Parlor and dining car service. (Advertisement.)

Boys' Stockings, Boys' Caps, etc. Boys' Rubber Raincoats and Hats.

NEWLY-FOUND ORE IN LOUISA COUNTY

Nova Scotian Expert's Opinion of Virginia Minerals—Lively Business On at Mineral.

Mineral, Va., October 5.—The Hon. Robert and Mrs. Drummond, of Harrison, Nova Scotia, are visiting in Louisa a few days, the guests of J. M. McSwain, general manager of the Arminius Chemical Company, and his kindly and highly respected mother, Mrs. Drummond. Mr. Drummond is a member of the legislative council of Nova Scotia. The council corresponds, in some respects, to that of the Senate in this country. Only the appointments made by the Governor are not affected by changes of government. In his own country Mr. Drummond is looked upon not only as an expert, but an authority on all matters connected with the coal trade, which ranks first in the industries of the province. He may not profess to be in any degree an expert on ore or metallurgical matters, yet he has a wide knowledge of surface mining plants in general. He is highly pleased with what he has seen at the mines of the Arminius Chemical Company, where there are visible tokens of late additions and improvements to the plant, and he frankly states that there is room for still further improvements and additions. Having known Mr. McSwain for very many years he feels confident that Mr. McSwain can effect further improvements which will result in the widening of the body being worked is sixty feet, and it is worked much after the system employed in coal mining, levels, rises or balances, and heads of crosscuts. Mr. McSwain is the course of operations a short time ago discovered near the hanging walls, a new mineral which he has christened arminiusite. If this new ore gives nearly as good milling, as it gave laboratory tests, the company has struck a bonanza. The laboratory test gave values of away over \$100 per ton. If the milling test yields \$40 per ton, the management and the company will be amply satisfied. This discovery may mean a great deal to the community and the State, as well as to the company. Its discovery will add to the optimism of those who believe that Virginia has mineral wealth in her hills and under her plains hitherto unregarded, calling for development. Prior to Mr. McSwain's advent the output of the mine averaged 250 tons daily. It is now considerably over 300 tons, with the prospects of an early increase to 400 tons daily. By the way, the ore in the new discovery is but two feet. Mr. McSwain is very hopeful that at a depth of 2,000 feet the old mineral will be wholly transformed into the new.

A new plant for generating electricity has lately been installed. The dynamo is not yet in place. This new machinery will produce a current equal to 600 volts. As this is more than required for the purpose of the company, it is suggested that the company run a line to Louisa and other points, and supply electricity for lighting purposes. This will probably be a source of profit to the company, and will surely add to the comfort and to the convenience of the people residing along the line and at the terminus.

So far as Mineral is concerned the vexed labor problem has been solved. There is no discontent. The workmen are fairly treated. They are comfortably housed and their surroundings tend to contentment. Mr. McSwain has had large experience with workmen, and evidently has come to the conclusion that to treat men decently is profitable for the company, the community and those most directly concerned, the employees. The company owns a number of homes which are rented to their workmen at a reasonable rate. Attached to each lot is a large plot of land. At present there are neither churches or places of recreation in the immediate vicinity of the mine, but it is in contemplation to secure both in the near future.
